

Too Hot for Tots! Resource Description

Complimentary Resource for BC Educator's and Fire Fighters

| Abstract: Educator Resource | <i>Educator's Handbook with Too Hot for Tots! DVD</i> |
|--|--|
|   | <p><u>Educator's Handbook</u> (sampler). This document provides educators with consistent, reliable, evidence-based information so they can teach caregivers of young children how to reduce the risk of a thermal injury in their home. The Handbook also shares best practice recommendations on how to effectively deliver this training in the community. The video disk, housed on the back cover of the Handbook, contains the following;</p> <ol style="list-style-type: none"> 1) Video <u>Too Hot for Tots!</u> (Running time 16:57). Through the power of storytelling and re-enactments, caregivers are shown why young children are susceptible to injury, how easily these injuries happen and how serious they can be. Safety strategies and emergency first aid are also covered in the video. 2) Video <u>How to Adjust Your Hot Water Temperature</u> (Running time 3:20). Caregivers are shown how to use the temperature testing card contained in the brochure, and how to safely reduce the hot waters temperature in their home. 3) Caregiver Discussion Slides– The 16 slides in this presentation, highlight the key messages from the videos and are to be shown as a review and to support group discussion after caregivers watch the videos. <p>Note: This resource was developed for facilitators and is not intended for distribution to caregivers. If caregivers wish to view the video from home, both videos are available on-line in English. For multilingual families, a “DVD lending library” is an option.</p> |
